PROFESSIONAL SUMMARY

Computer Science undergraduate at Iqra University with a CGPA of 3.64, specialising in Data Science, Machine Learning, and Artificial Intelligence. Award-winning developer with achievements including 1st Place at Vision (Aptech) and 2nd Worldwide at Techwiz 5. Skilled in building machine learning pipelines, computer vision systems, REST API integrations, and AI-powered applications.

EDUCATION

Iqra University	Karachi, Pakistan
<i>Bachelor of Science in Computer Science — CGPA: 3.64 / 4.00</i>	2023 – 2027
D. J. Sindh Government Science College	Karachi, Pakistan
<i>Intermediate (Pre-Engineering) — Grade A-1</i>	2021 – 2023
K.B.V CAA Model School 1	Karachi, Pakistan
<i>Matriculation (Science) — Grade A-1</i>	2019 – 2021

PROJECTS

CIRO — Crisis Intelligence and Response Orchestrator <i>Python, Machine Learning, REST APIs</i>	2026
- Co-built an AI-powered disaster-response platform for emergency monitoring and intelligent response orchestration - Engineered Python data pipelines and ML inference modules for real-time crisis analysis - Integrated external APIs for situational awareness and decision support - Worked on scalable backend logic and real-time response workflows	
Facial Expression Recognition System <i>TensorFlow, Keras, CNN, OpenCV</i>	2025
- Built a simple CNN-based AI model to detect human facial expressions from webcam images - Used TensorFlow, Keras, CNN, and OpenCV for emotion detection and real-time face recognition - Worked on identifying emotions like happy, sad, angry, and surprised using computer vision	
End-to-End Machine Learning Pipeline <i>Python, Pandas, Scikit-learn</i>	2025
- Built a complete 5-phase machine learning workflow from data ingestion to deployment - Performed preprocessing, feature engineering, model training, and evaluation - Applied regression, classification, and ensemble learning techniques	
Jarvis — AI Voice Assistant <i>Python, APIs, Speech Recognition</i>	2025
- Developed an AI voice assistant with speech recognition and automation features - Integrated weather lookup, web search, and task execution using APIs	
Vortex Vengeance and Techwiz 5 Games <i>Game Development</i>	2024 – 2025
- Designed and developed games for international technology competitions - Achieved 1st Place at Vision (Aptech) and 2nd Worldwide at Techwiz 5	

CERTIFICATIONS

IBM	2025
<i>Machine Learning with Python</i>	
IBM	2025
<i>Data Analysis with Python</i>	
IBM	2025
<i>Python for Data Science and AI</i>	
Microsoft	2025
<i>Data Analysis and Visualization</i>	
Vanderbilt University	2025
<i>Prompt Engineering for ChatGPT</i>	

LEADERSHIP AND COMMUNITY

Mathematics and Chemistry Tutor

Private Tuition

2023 – Present

Karachi, Pakistan

- Teach Grade 9–10 students Mathematics and Chemistry through personalised study plans
- Help students improve academic performance and examination preparation

Content Creator — Pegham-e-Hidayat

Instagram Educational Platform

2024 – Present

Remote

- Create Islamic educational short-form video content for community engagement
- Handle scripting, editing, publishing, and audience interaction

TECHNICAL SKILLS

Languages: Python, SQL, HTML/CSS

Machine Learning: Scikit-learn, TensorFlow, Keras, CNN, Deep Learning, OpenCV

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

Developer Tools: Git, REST APIs, VS Code, Google Colab

Other Skills: Microsoft Excel, Data Visualization, Prompt Engineering, Machine Learning Pipelines
